# Overview – AI Foundations Assessment Discovery

- 01 Situation, problem and solution
- 02 Assessment process
- 03 Insights into the assessment methodology
- 04 Questions & Answers
- 05 Next steps

**We have established a standardized approach to assess AI readiness in its various areas.**

# Situation, problem and solution

## Why an AI Foundations Assessment for Life Sciences organizations?

### SITUATION

- AI is a key topic on the strategic agenda of most organizations
- Scaling AI adoption is complex and affects many areas
- Many companies have started foundation work and use cases

### PROBLEM

- The current hype creates confusion about what is really needed
- Initiatives are often not well integrated, leading to duplication or gaps
- AI use cases will not scale without strong foundations, especially in Life Sciences

### SOLUTION

- Run an AI Foundations Assessment to understand your current state
- Use a structured approach that delivers results quickly
- Define a clear roadmap aligned with your business goals

**Let us check your base and identify insights that help you advance on your journey.**

# Assessment process

From Kickoff to Management Report in 2 – 8 weeks

**The duration of the assessment accommodates the complexity of your processes, the intended depth of the assessment and availability of your stakeholders.**

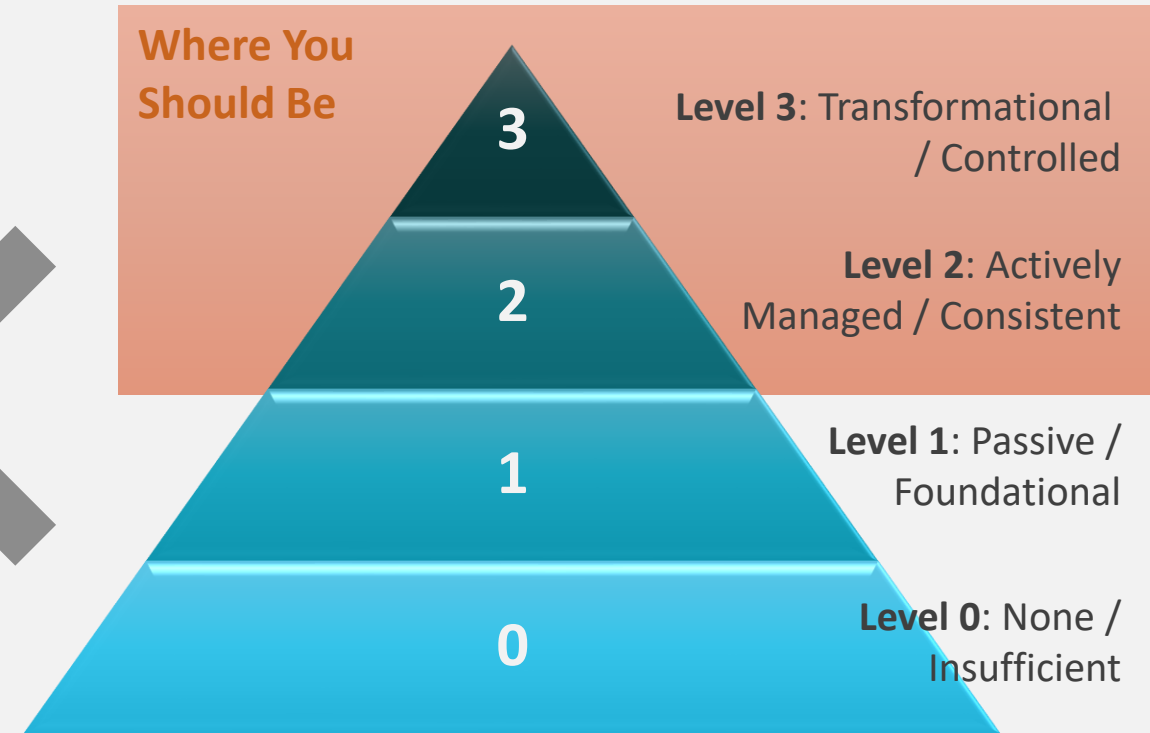

# Insights into the assessment methodology

Based on many years of experience in AI projects

## ASSESSMENT AREAS

## ASSESSMENT LEVELS

Assessment areas are detailed by sub-categories, with clear definition of readiness levels. Sub-category levels are aggregated to overarching readiness indications.

# What is the result and outcome of the AI Foundation Assessment?

**Understanding of Current State**

**Clear view of your current state**

- Visual overview of your AI maturity
- Scores across all assessment areas
- Shared understanding of risks and gaps

**Measures for Improvement**

**Clear priorities for action**

- Identified improvement areas
- Practical recommendations
- Focus on what creates the most value

**Actionable Roadmap**

**Structured roadmap**

- Prioritized actions
- Clear sequencing of initiatives
- Alignment with other efforts

Category	Sub-Category	Score
